Core Skills

- ReactJS
- TypeScript
- ExpressJS
- MongoDB
- Webpack
- Front end development
- Problem solving
- AGILE/teamwork
- Understanding user requirements

Professional Profile

Studied four years in Dundee University. Throughout my studies, I have gained a comprehensive understanding of a wide range of computer science concepts and object-oriented languages. I am currently exploring and creating full-stack web development applications utilizing technologies such as ReactJS, TypeScript, ExpressJS, and MongoDB.

Education

- **BSc Hours Applied Computing** | Dundee University | Sep 2018 - May 2022 | Courses included computer science concepts, AGILE projects and popular languages.

Career Summary

Sep 2021 - Present

Teamsport, London
Host

Additional

Hobbies & Interests

Experimenting new frameworks, Advent of code, Modding, Sports team, Chess, Football

Software

GitHub, VS Code, Linux

Projects

Inventory management app: Fullstack web app that allows storing items in a MongoDB database with search, edit and delete queries.

CV creator: Edits a CV template with a realtime preview. The goal was to become comfortable with using React hooks such as useState.

Android gps app: An app that tracks the users car journeys and provides details on the journey to and from work. These include the car speed, sudden breaking, distance travelled and a weekly summary comparing results.

Weather app: Uses an open source api to get weather information from the provided location. The goal was to gain experience with understanding an existing api.
